

Mathieu DIEP

AI Engineer

 mathieu.diep.95@gmail.com

 +33 6 02 37 03 24

 Barcelona, Spain

 LinkedIn: <http://linkedin.com/in/mathieu-diep/>

Skills

AI & ML

- LLM
- RAG
- Generative AI
- Prompt Engineering
- Fine-tuning
- NLP
- NLU
- Computer Vision
- GANs
- Machine Learning
- Deep Learning

Data Science

- Statistics
- Data Analysis
- Data Visualization
- Predictive Modeling
- Feature Engineering
- Model Evaluation

Programming

- Python
- SQL
- Pandas
- NumPy
- SciPy

Tools

- Git
- GitLab
- GitHub
- Jupyter Notebooks
- CI/CD
- Docker
- LangChain
- PyTorch
- TensorFlow
- Keras
- Hugging Face
- FastAPI
- Flask
- React JS

Methodologies

- Agile
- Scrum
- MLOps
- Data Pipeline
- Model Deployment

Soft Skills

- Communication
- Simplifying technical concepts
- Teamwork
- Innovation mindset
- Problem-solving mindset

Languages

French: Native

English: Professional

Spanish: A2

Hobbies

- Beach Volley
- Badminton
- Ice Skating
- New Technologies
- Traveling

Professional Experience

● **AI Engineer - Generative AI** *January 2024 – Present*
Hexamind - Paris

- Development and deployment of LLM-based chatbot serving 90,000+ users in production
- Implementation of RAG (Retrieval-Augmented Generation) architectures to improve response accuracy
- Use of LLM, Open AI, Langchain for the chatbot
- Test base to evaluate the performances of the bot

Technologies: LLM, RAG, Python, LangChain, Vector Databases, OpenAI, Generative AI

● **AI Engineer** *October 2021 – March 2023*
Lincoln - Paris

- ORANGE RASA Chatbot optimization handling 1M+ monthly queries: Model fine-tuning and dataset augmentation (+3% F1 Score), customer journey redesign based on KPIs with linguist collaboration. Agile/Scrum team.
- A/B Testing implementation to optimize customer journey for data-driven decision-making
- VoiceBot PoC development using Microsoft STT/TTS APIs with Siri-like functionality
- Behind the Mask: Computer Vision model deployment with React JS interface for facial reconstruction during COVID-19
- Neural Network Development: Custom AI model achieving +20% performance improvement vs. linguist-based solution

Technologies: RASA, Python, Neural Networks, NLP, Computer Vision, React JS, A/B Testing, Voicebot, Agile

● **Internship** *December 2020 – May 2021*
Capgemini - Toulouse

- Data analysis and performance optimization of blockchain network
- Statistical modeling and reporting

Technologies: Python, Data Analysis, Statistics, Blockchain

● **Internship - AI Research** *February 2019 – July 2019*
Aubay - Paris

- Artificial intelligence for computer-assisted musical composition
- Research on neural networks and deep learning architectures

Technologies: Deep Learning, Neural Networks, PyTorch, Research

● **Internship** *January 2018 – June 2018*
Orange Labs - Caen

- Health software application development - Visualization interface
- Development

Technologies: Software Development, Visualization

Education

● **Master 2 - Information System Security** *September 2020 - 2021*
University of Technology of Troyes
Double degree

● **Engineering Degree - Computer Science and Information System** *September 2015 - 2020*
University of Technology of Troyes
AI specialization - 2 semesters abroad (Canada & China)
